Conflict of Interest (COI) Disclosures

Information as of July 1, 2017

To ensure that deliberations of the Scientific Registry of Transplant Recipients (SRTR) Visiting Committee (SVC) and any subcommittees do not constitute a conflict of interest (COI) for its members, the SRTR collects COI disclosures from voting and ex-officio members.

See below for questions asked and information disclosed. Disclosed information suggesting that an individual may have a potential conflict of interest regarding one or more aspects of his/her work for the SRTR will be evaluated to determine whether action is needed to manage, reduce, or eliminate the conflict. Actions taken may include exclusion of an individual from specific activities, projects, discussions, or votes; in some instances, a conflict may preclude an individual from working with the SRTR in any capacity.
